

### Task 5: Measures of Central Tendency

**Dataset:** [3, 5, 5, 6, 7, 100]

- **Mean:**  $(3 + 5 + 5 + 6 + 7 + 100) / 6 = 21$
- **Median:**  $(5 + 6) / 2 = 5.5$
- **Mode:** 5
- **Interpretation:** The mean is skewed by 100; the median and mode better represent the central trend.
